

Julius de Bruijn

SENIOR RUST SYSTEMS ENGINEER · 8+ YEARS IN INTERNET INFRASTRUCTURE

social.nauk.io/pimeys

✉ julius@nauk.io 🌐 pimeys 🌐 Julius de Bruijn

Professional Summary

Product-focused Rust engineer with **8+ years** shipping infrastructure from idea to production. Recent work spans developer experience, documentation, and market-driven product design at Grafbase and Twin, alongside widely used Rust libraries including Tiberius (**3.3M downloads**).

Technical Expertise

- **Product Engineering:** Developer Experience, API Design, Documentation, Market Research, End-to-end Ownership
- **Core Technologies:** Rust, Async/Tokio, AI agents, WebAssembly/WASI, GraphQL, MCP, Databases
- **Technical Writing:** API docs, architecture guides, migrations, and integration examples

Professional Experience

Twin

twin.so • Remote

FOUNDING ENGINEER • PRODUCT ENGINEERING

Feb 2026 – Present

- Rust-heavy product engineering for AI agents, with some TypeScript and product design; led AI-agent use in engineering
- Evaluate language models and providers; cut inference costs through benchmarking and provider selection
- Built GEPA, a Genetic Pareto optimizer
- Own Nix-based infrastructure and developer environments

Grafbase

grafbase.com • Remote

LEAD ENGINEER

May 2023 – Jan 2026

- Led Nexus AI router, Grafbase SDK, and PostgreSQL connector from concept to launch
- Researched the MCP ecosystem and built Nexus tool discovery and routing
- Turned customer research into an extensible SDK with strong documentation
- Designed a WASI-based PostgreSQL connector and documented migration paths from Hasura

Prisma

prisma.io • Berlin, DE

SENIOR SOFTWARE ENGINEER • CORE CONTRIBUTOR (1,388 COMMITS)

Feb 2019 – Apr 2023

- Created Tiberius SQL Server driver from scratch, reaching **3.3M downloads**
- Core contributor with **1,388 commits** during Prisma's Rust migration and engine work
- Built the Node.js NAPI integration layer, delivering **10x performance improvement**
- Worked on introspection, PSL parser/formatter, and open source maintenance for **12M+ weekly downloads**

360dialog

360dialog.com • Berlin, DE

SENIOR SOFTWARE ENGINEER • PIONEER IN COMMERCIAL ASYNC RUST

Apr 2016 – Sep 2018

- Built one of the first commercial async Rust systems on Tokio 0.1 and Futures 0.1
- Designed push infrastructure delivering **100M+ notifications daily**
- Architected multi-tenant APNS, FCM, and Web Push systems with **99.99% delivery rate**
- Open-sourced A2 (**550K downloads**) and rust-web-push

Fyber

fyber.com • Berlin, DE

SENIOR SOFTWARE ENGINEER • AD TECH PLATFORM

Sep 2011 – Mar 2016

- Rebuilt ad-serving components in Scala, handling **1B+ requests daily**
- Designed a distributed statistics pipeline with ZeroMQ, reducing latency by 75%
- Helped rewrite backend infrastructure to **99.95% uptime** and horizontal scale

Open Source and Technical Leadership

- **Early Async Rust Pioneer:** Built production async systems before stable async/await
- **Tiberius:** Creator and maintainer of the SQL Server driver with **3.3M downloads** and **500+ stars**
- **A2:** HTTP/2 APNS client with **550K downloads**, used in WalletConnect's notification infrastructure
- **Documentation:** API references, migration guides, architecture docs, and developer-facing best practices

Education

Aalto University

Espoo, Finland

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

2006 – 2011

Focus: Software Engineering and Business, Multimedia Technology

Additional Information

Languages: Finnish (Native), English (Fluent) **Location:** Open to remote and relocation opportunities **Interests:** NixOS, Home Automation, Open Source, Type Systems
